

Anderson Custom Rods

EPS – Effortless Power Series LS – Line Speed

Anderson Custom Rods continues to build an extensive line of fly rods on my own blanks. Choose either the smooth casting, progressive action **EPS–Effortless Power Series** or the fast action **LS–Line Speed**.

Both models feature extra high modulus graphite resulting in a small diameter, thick walled shaft, that is not only beautiful but durable as well. These rods may well become family heirlooms, but only after they catch many fish for you!

ACR blanks are so strong and durable that I feature a no fault warranty. If it breaks, for any reason, I'll repair a tip or mid-section for \$30, and a butt section for \$50.

LS and **EPS** models are available in 9', 9 ½', and 10' lengths. The 9' model can be ordered in either 3, 4, or 5 piece. The 9 ½' and 10' rods are built on 3 and 4 piece blanks.

Whatever species of fish you are chasing, there is an **Anderson Custom Rod** to help you catch it!

Line size choices:	9' rods	Line sizes:	3 weight through 10 weight
	9 ½'		6, 7, and 8 weight
	10'		5, 6, 7, and 8 weight

<u>Deluxe Finish</u>	LS	\$500.00	EPS	\$500.00
-----------------------------	-----------	----------	------------	----------

This is my most beautiful finish. Each rod features a distinctive gold wire trim wrap on every guide. You select the grip design and reel seat options. I inscribe your name before applying my lustrous epoxy coating.

All Deluxe rods come with a protective aluminum tube.

<u>Standard Finish</u>	LS	\$400.00	EPS	\$400.00
-------------------------------	-----------	----------	------------	----------

My Standard Finish rods show the same care, attention to detail, and name inscription as my other rods, but without the accent trim wraps or the aluminum tube.
