

Anderson Custom Rods

Trout Rods

As an industry leader in Spey rod design and construction, **Anderson Custom Rods** produces some of the most popular Spey rods on the market. Rods to cover the complete gamut of two-handed fishing!

Whether your interests lie with Trout, Chinook Salmon, or Steelhead, **ACR** has a Spey rod to match.

Trout Speys are the fastest growing segment of the two-handed market, and as always, **ACR** is one of the leaders in this field. Whether you desire a very light rod for pocket water nymphing, or feel the need to single spey a streamer to the far bank, there's an **ACR** to match your wants. Line sizes 3, 4, and 5.

ACR Trout Spey Rods

- 1193-5** At 11'9" this five-piece 3-weight is a switch rod on growth hormones! This is an awesome high-stick rod.
- 1194-5** An 11' 9" 4-weight five-piece travel Trout Spey--slow and sweet.
- 1195-5** 11' 9" 5-weight five-piece. A rod for the trout guy that likes steelhead. A 400 gr. Skagit rocks!

Hybrid Fly Rods

The perfect companion for the traveling angler—it's two rods in one—a spey and a single-hand. By removing the two bottom sections of a spey rod and replacing with a single hand section you can have both! Almost all of our spey rods can be hybridized. Call Gary for details and suggestions.

Switch Rods

ACR has a complete line of 11'0" switch rods from 5-9 weight. These rods are light enough to be cast and fished single-hand, but with their three inch rear grip can also be spey cast with the same line. These rods are ideal for use on smaller to mid-sized rivers.
